

NATL Grid Map

50-Meter Grid

Locations in NATL can be specified by reference to a grid system based on north-south gridlines (A-O) and east-west gridlines (1-12). Gridlines are at 50-m intervals. Each gridline intersection ("grid point") is identified by its two gridlines (e.g., E5). Each 50x50-m block formed by the gridlines is identified by the grid point in its northwest corner (e.g., block G9 is north of Gasline Trail and west of the Surge Area).

Public and Restricted Areas

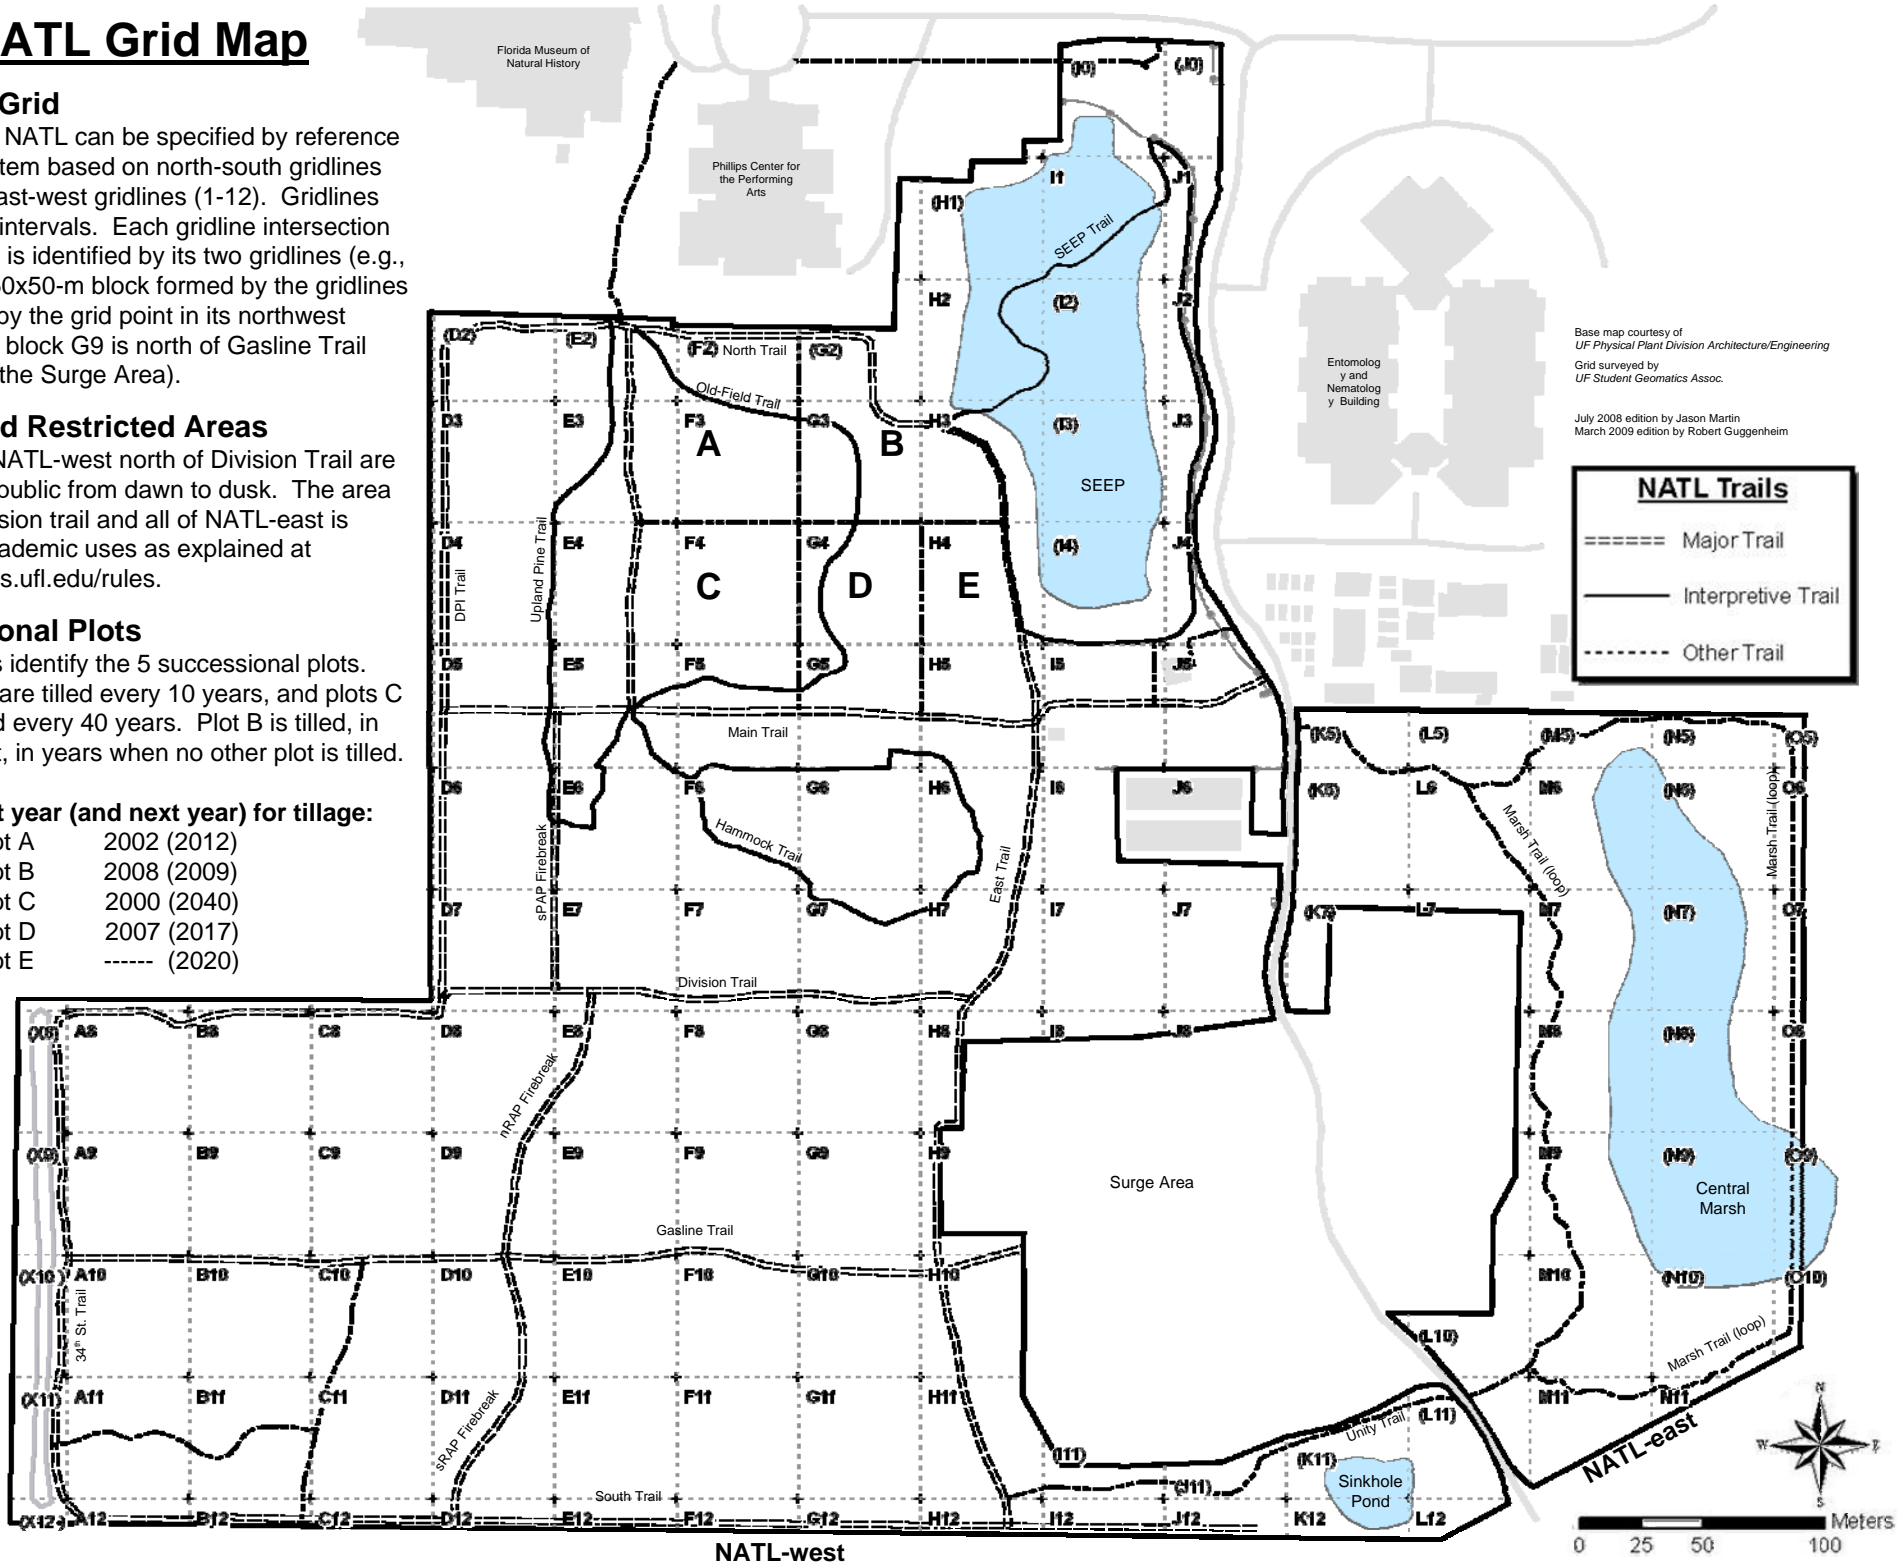

All parts of NATL-west north of Division Trail are open to the public from dawn to dusk. The area south of division trail and all of NATL-east is limited to academic uses as explained at <http://natl.ifas.ufl.edu/rules>.

Successional Plots

Large letters identify the 5 successional plots. Plots A & D are tilled every 10 years, and plots C & E are tilled every 40 years. Plot B is tilled, in full or in part, in years when no other plot is tilled.

Most recent year (and next year) for tillage:

Plot A	2002 (2012)
Plot B	2008 (2009)
Plot C	2000 (2040)
Plot D	2007 (2017)
Plot E	----- (2020)
