

# Notice for

## Log-Rolling Entomologists

In your efforts to find insects and other arthropods in UF's Natural Area Teaching Laboratory, ***please*** return to their **original positions any logs or other dead wood you move.** This will restore the habitat of the arthropods you do not collect, and make for better finding or collecting by the next user.

*Restoring logs to their former places is especially important along Nature Trails and roadways. This helps keep the trails and roadways accessible to other users.*

**Thank you for your assistance!**
