

Identifying numbers of pines in Block B of NATL's Upland Pine

This map shows the "P-number" for each of its pine trees.

How to use these numbers is at <http://natl.ifas.ufl.edu/maps/pinemaps.php#upmaps>.

Key

- legacy longleaf
- ⊙ recent longleaf
- ▲ loblolly
- slash pine
- ⊗ pine snag
- ⊕ grid stake
- - - grid lines (50m)
- ⋯ grid lines (25m)
- === major trail
- nature trail
- - - other trail

Grid blocks: Each 50x50m grid block is defined by a grid stake at each corner and is named after the stake in its NW corner. On this map each grid block is divided into a NW, NE, SE, and SW 25x25m "quarter grid block." The grid stakes are at permanently surveyed points. The other three corners of each ¼ grid block may be marked with temporary stakes that were located by measuring from the surveyed points.
